

# TWO PIECE JETS

The TWO PIECE JETS with precise watering patterns and economical for effective watering.. Winged base for easy hand.

## FEATURES

- ◆ Grooved ring base with “Quick” thread for rapid and easy installation.
- ◆ No tools required.
- ◆ Choice of three spray patterns - 360° stream, 180° fan, 90° fan.
- ◆ Colour coded bases for flow rate identification.
- ◆ Caps feature a snap ring which firmly engages the base.
- ◆ Choice the valve units can adjusts radius of throw and reduces flow.

## APPLICATIONS

Suitable for home, landscaped gardens and horticultural applications.

| Color and Orifice size | Blue 1.0 mm      |                                                                                   |                                                                                   |                                                                                   | Green 1.5 mm     |                                                                                   |                                                                                   |                                                                                   | Black 1.7 mm     |                                                                                    |                                                                                     |                                                                                     | Red 1.9 mm       |                                                                                     |                                                                                     |                                                                                     |
