

PRESSURE REGULATORS

The **PRESSURE REGULATORS** is ideal for installations requiring lower flows including solid-set, drip or other low-volume irrigation systems as well ascent pivot and other mechanical-move irrigation systems.

FEATURES

- ◆ #5563 series achieved Lower flows at 0.1 - 8.0 GPM.
 - Female Inlet size: 3/4" NH, 3/4" NPT, 3/4" BSP, 3/4" BSP Pipe thread
 - Male Outlet size: 3/4" NH, 3/4" NPT, 3/4" BSP, 3/4" BSP Pipe thread
- #5564 Series achieved Middle lower flows at 0.5 - 12 GPM.
 - Female Inlet size: 3/4" NH, 3/4" NPT, 3/4" BSP, 3/4" BSP Pipe thread
 - Male Outlet size: 3/4" NH, 3/4" NPT, 3/4" BSP, 3/4" BSP Pipe thread
- #5565 Series achieved Medium flows at 2 - 20 GPM.
 - Female Inlet size: 1" NH, 1" NPT, 1" BSP, 1" BSP Pipe thread
 - Male Outlet size: 1" NH, 1" NPT, 1" BSP, 1" BSP Pipe thread
- ◆ Preset outlet pressure at 15, 20, 25, and 30 PSI.
- ◆ A variety of thread for more choice.
- ◆ Maintains a constant preset outlet pressure while handling varying inlet pressures
- ◆ Built for strength and durability using high-impact engineering-grade thermoplastics
- ◆ Easy to assemble with garden watering system.
- ◆

APPLICATIONS

Suitable for Turf irrigation systems, Drip and low flow irrigation systems, Center pivot spray/sprinklers, Commercial/ Residential, and Growers/Greenhouses.
